DEP-ADO

# Detection of Alcohol and Drug Problems in Adolescents (DEP-ADO)

The DEP-ADO is a screening tool for quickly assessing the presence of problematic alcohol and drug use in adolescents. It facilitates the identification of young people who are at risk or have substance-related difficulties in order to guide the appropriate intervention or follow-up.

| | |
|---|---|
| Number of questions | 17 questions |
| Estimated duration | 10 minutes |
| Language | English |
| Original name | Detection of problematic alcohol and drug use among adolescents |
| Target audience | Adolescents |
| Authors | Michel Germain, Louise Guyon, Michel Landry, Joël Tremblay, Natacha Brunelle, Jacques Bergeron (2001) |

### Administer your questionnaires online

Send your patient a link: they answer from their phone or computer, and you receive the scored results by email.

View the questionnaire on mentaal.org ›

## Scoring & interpretation

Each question receives a specific score, which is used to calculate a total score that guides interpretation: low risk, moderate risk, or problematic use. Specific cutoffs indicate the need for additional interventions.

## Are you a psychologist?
