

Sensory Profile 2 (SP2)

The Sensory Profile 2 is a battery of questionnaires designed to assess how children process and respond to sensory information in their daily lives. Used mainly to identify sensory differences likely to affect behavior, learning, or participation, the SP2 makes it possible to establish a detailed sensory profile based on observations by people close to the child.

Number of questions	86 questions
Estimated duration	15 minutes
Language	English
Original name	Sensory Profile 2
Target audience	Children aged 7 months to 14 years 11 months
Authors	Winnie Dunn (2014)
Category	Childhood

Preview of the 86 questions

My child...

reacts strongly to unexpected or loud noises (for example, sirens, dog barking, hair dryer).

Almost Always (90% or more of the time) | Frequently (75% of the time) | Half the Time (50% of the time) | Occasionally (25% of the time) | Almost Never (10% or less of the time) | Does Not Apply

My child...

holds hands over ears to protect them from sound.

Almost Always (90% or more of the time) | Frequently (75% of the time) | Half the Time (50% of the time) | Occasionally (25% of the time) | Almost Never (10% or less of the time) | Does Not Apply

My child...

struggles to complete tasks when music or TV is on.

Almost Always (90% or more of the time) | Frequently (75% of the time) | Half the Time (50% of the time)

Occasionally (25% of the time) | Almost Never (10% or less of the time) | Does Not Apply

My child...

is distracted when there is a lot of noise around.

Almost Always (90% or more of the time) | Frequently (75% of the time) | Half the Time (50% of the time)

Occasionally (25% of the time) | Almost Never (10% or less of the time) | Does Not Apply

My child...

becomes unproductive with background noise (for example, fan, refrigerator).

Almost Always (90% or more of the time) | Frequently (75% of the time) | Half the Time (50% of the time)

Occasionally (25% of the time) | Almost Never (10% or less of the time) | Does Not Apply

Administer your questionnaires online

Send your patient a link: they answer from their phone or computer, and you receive the scored results by email.

Scoring & interpretation

Each question is scored on a frequency scale of observed behaviors. Raw scores are converted into standardized scores that fall into different descriptive categories (typical, more frequent or less frequent, etc.), making it possible to identify sensory profiles and guide intervention.

Usage

This tool isn't available on Mentaal. To use this questionnaire in your practice, you need a valid license. We invite you to send it directly from the publisher's website.
